PERSONAL STATEMENT

MSc in Data Science with three years of professional experience in supply chain, finance, and telecom — three domains where data accuracy, regulatory compliance, and market interpretation are daily practice. Built an independent portfolio demonstrating end-to-end analytical skills across SQL, Python, machine learning, R, Power BI, and Tableau, with projects spanning telecom, supply chain, and financial data science.

SKILLS

- MySQL, SQL Server, T-SQL (SSMS) | PostgreSQL
- Python (Pandas, NumPy, Matplotlib, Seaborn)
- Power BI (DAX, Power Query, Data Modelling)
- Tableau
- R
- Machine learning
- Git, GitHub | VS Code | Draw.io
- Kaggle (dataset publishing)

WORK EXPERIENCE

Data Manager — Golis Telecom | Somalia

Jan 2025– Present

- Managed enterprise data across telecommunications operations, finance, and supply chain functions, ensuring data accuracy, consistency, and compliance with organizational standards.
- Developed and maintained dashboards, reports, and KPIs to support executive decision-making and operational performance monitoring.
- Led data collection, validation, cleaning, and integration processes from multiple business systems to improve data quality and reliability.
- Collaborated with finance, supply chain, and technical teams to analyze business performance, identify trends, and provide actionable insights.
- Utilized SQL, Excel, Power BI, and analytical tools to automate reporting processes and enhance data accessibility across departments.
- Monitored network performance, customer usage patterns, revenue metrics, and operational indicators to support strategic planning and resource allocation.
- Established data governance practices, ensuring data integrity, security, and consistency across organizational datasets.
- Conducted predictive and trend analyses to support budgeting, forecasting, inventory planning, and business growth initiatives.
- Prepared management reports and presentations for senior leadership, translating complex data into clear business recommendations.
- Supported cross-functional projects involving telecommunications operations, financial analysis, and supply chain optimization through data-driven insights.

Business Data Analyst — eTeam | South Korea

Jan 2024– Oct 2024

- Led and managed client engagements for the Prophet Data Management Platform, serving as the primary contact for project delivery and consulting activities.
- Designed and facilitated workshops to gather business requirements and align stakeholders on solution strategies.
- Configured and implemented the Prophet Solution (with IDR), ensuring compliance with regulatory frameworks.
- Delivered comprehensive training and ongoing support to clients, enabling effective adoption of data management solutions.
- Collaborated with cross-functional teams to integrate AI capabilities and Python-based automation into client environments.
- Documented business processes and maintained project records to ensure transparent governance.

- Assisted the supervising professor in designing and executing statistical research projects, ensuring methodological rigor and alignment with academic objectives.
- Collected, cleaned, and preprocessed large datasets using Python and R, applying statistical techniques to ensure data quality and readiness for analysis.
- Developed and implemented machine learning models and statistical algorithms to extract meaningful insights and support evidence-based research conclusions.
- Conducted exploratory data analysis (EDA) and produced visualizations to communicate complex findings clearly to academic and non-technical audiences.
- Contributed to the preparation of research reports and academic papers, including literature reviews, methodology sections, and interpretation of quantitative results.
- Collaborated with faculty and fellow researchers within the Department of Statistics to support ongoing studies, peer review activities, and departmental academic initiatives.

EDUCATION

MSc in Data science — Konkuk University / Cardiff Metropolitan University — Seoul, South Korea	Aug 2022– Aug 2024
BSc in Telecommunications — Golis University — Hargeisa, Somalia	Oct 2014– Sep 2017
Intensive Korean Language — Chonnam National University — Gwangju, South Korea	Sep 2020– Aug 2021

PROJECTS

Financial Inclusion Analysis— End-to-End Data Pipeline | Python |

- Analyzed financial inclusion in East Africa (Kenya, Rwanda, Tanzania, and Uganda) using a dataset of 23,000+ individuals to identify key socio-economic and demographic barriers to bank account ownership.
- Performed data cleaning, transformation, and feature standardization using Python (Pandas, NumPy) to ensure data quality and consistency for analysis.
- Conducted exploratory data analysis (EDA) and visualization using Matplotlib and Seaborn to uncover patterns in financial access across gender, education, employment, and geography.
- Identified critical insights and provided data-driven recommendations to improve financial inclusion for governments, banks, telecoms, and development organizations.

Supply Chain Analysis— End-to-End Data Pipeline | Power BI |

- Built an interactive Power BI dashboard to analyze inventory and supply chain operations, tracking KPIs such as warehouse utilization, inventory turnover, lead time, and transportation cost.
- Performed data modeling and transformation using Power Query and DAX to clean and structure a 1,200-row dataset for accurate reporting and analysis.
- Analyzed supply chain performance across regions and product categories, identifying inefficiencies in warehouse usage, fulfillment rates, and supplier lead times.
- Delivered actionable insights and recommendations to improve inventory efficiency, reduce backorders, and optimize logistics and warehouse capacity.
